

# Sam van de Kreeke

Front-End Engineer

## Profile

I'm a developer passionate about creating seamless, user-focused experiences where clean design meets solid engineering. I enjoy working across the stack, crafting solutions that not only look great but are thoughtfully built for performance, scalability, and maintainability.

## Experience

### Front-End Engineer at Podobrace

2022 — Present

Build and maintain the core components used to construct Podobrace's frontend, while also supporting backend development. Collaborate closely with marketing specialists, SEO experts, and designers to create fast, accessible, and conversion-focused user experiences.

### Front-End Developer at Betty Blocks

2019 — 2022

Part of the Betty Blocks team focusing on user onboarding. Built features and improvements to ensure new users had a smooth and intuitive onboarding experience, working closely with cross-functional teams to align on user needs and product goals.

### Worker at Triflor

2015 — 2019

Assisted with tulip and bulb processing at Triflor, supporting daily operations in a fast-paced environment and gaining early experience in hard work, responsibility, and collaboration.

## Education

### Horizon College

2016 — 2019

Mbo 4: Application and media developer
